TABLE OF CONTENTS

Table No	•	Page No.
	Highlights	3
1.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, November	4
2.	Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-November averages	6
3.	Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, November	8
4.	Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, November	10
5.	Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-November	12
6.	Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, October, with comparisons	14
7.	Federal milk order Class I formula price information, November	18
8.	Prices and economic indexes used in Federal milk order formulas to determine November prices, with comparisons	19
9.	Federal order base and excess prices for milk of 3.5 percent butterfat content, November	20
9a.	Seasonal incentive fund included under various Federal milk orders, November	20
	Major order actions, November	21

Highlights

NOVEMBER 1966

<u>Producer Deliveries</u>. A total of 129,473 producers, 5,910 fewer than in November 1965, delivered 3.7 billion pounds of milk to regulated handlers in 66 comparable markets during November 1966. This represents an increase of 1.0 percent above producer deliveries in November 1965. Average daily delivery per producer increased from 891 pounds in November 1965 to 941 pounds in November of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown in table 3.

<u>Producer Deliveries Used in Class I.</u> The volume of producer deliveries used in Class I in 66 comparable markets decreased 1.1 percent from last year, to a total of 2.6 billion pounds for the month of November 1966. The average utilization percentage for November was 71 percent, down from 73 percent last year. Fourteen markets showed an increase in the utilization percentage, 7 showed no change, and the remaining 45 markets showed a decrease (see table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 1.1 percent in the 66 markets for the month of November.

Minimum Prices. The weighted average Class I price paid by handlers in the 66 markets for 3.5 percent milk was \$6.05 per hundredweight, 77 cents higher than the \$5.28 per hundredweight price in November 1965. Minimum Class I prices in November were higher in all 66 markets.

Producers in the 66 markets received a weighted average blend price of \$5.53 per hundredweight for 3.5 percent milk. This is 72 cents higher than the November 1965 blend price of \$4.81. Producers received higher blend prices in all 66 markets. Class prices, blend prices, and associated butterfat differentials, by market are reported in table 1.

Whole Milk Sales. Total in-area whole milk sales for November 1966 in 66 marketing areas are estimated to be about 1.8 billion pounds, 2.8 percent below such sales in November of last year. Complete October in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported in table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-November period for the 66 markets was \$5.59, 59 cents higher than the \$5.00 price in 1965. The 1966 weighted average blend price was \$4.96, 60 cents higher than the blend price of \$4.36 reported for this period in 1965 (see table 2).

<u>Producer Deliveries and Deliveries Used in Class I</u>. Milk deliveries and deliveries used in Class I are reported for individual markets in table 5. In the first eleven months of this year, compared to the same period in 1965, producer deliveries for the 66 markets were down 0.1 percent, and deliveries used in Class I were up 1.5 percent. Data for the 66 markets and for all markets are summarized below:

Amendments:

Southeastern Florida - November 1 (31 FR 13901, 10/29/66). Marketing area expanded to include the Florida counties of Glades, Hendry, Indian River, Martin, Okeechobee, and St. Lucie. To qualify for pooling, a supply plant must ship at least 50 percent of its Grade A receipts each month to pool distributing plants. Diversions by a cooperative association are limited to 25 percent of its member milk physically received during the month at pool plants. Action provides for Class I and Class II products which are dumped or disposed of for livestock feed to be classified as Class III. The area in which a nonpool plant must be located in order for a pool plant to receive other than Class I classification for bulk transfers is changed from 500 miles beyond Boca Raton to 500 miles beyond West Palm Beach Florida.

Butter-powder formulas no longer used as bases for Class II and Class III prices. The Class II price is the Minnesota-Wisconsin price plus \$1.00 and the Class III price is the Minnesota-Wisconsin price plus 15 cents. Amendment provides for a fixed butterfat differential of 7.5 cents for Class I and Class II. The butterfat differential for Class III and Class IV would be the Chicago 92-score butter price for the current month times .115. The producer butterfat differential would be the veighted average of the differentials for all classes.

The basing point for computing location adjustments changed from Boca Raton to West Palm Beach, Florida. For plants located 80 to 90 miles from West Palm Beach the price would be reduced 13 cents and an additional 1.5 cents for each additional 10 miles or fraction thereof.

<u>Tri-State</u> - November 1 (31 FR 13899, 10/29/66). To qualify for pooling, a supply plant must ship to pool distributing plants at least 50 percent of its Grade A receipts during the months of September through November, and at least 40 percent during any other month. If this requirement is met during each of the months of September through March, the plant has automatic pool plant qualification during the months of April through August.

Amendment provides for milk diverted from a pool plant to a nonpool plant to be priced at the location of the plant to which diverted rather than the plant from which diverted. Producer milk handled through a reload point would be priced at the location of the reload point rather than the location of the pool plant to which delivered.

Suspension:

Mississippi - November 1 (31 FR 13910, 10/29/66). Suspension continues for November the Class I price provision of the order, which otherwise would expire on October 31, 1966.
